to Gregory

Dear Gregory,

We are pleased to inform you that your submission number 113, entitled:

Structural Parameterizations of the Mixed Chinese Postman Problem

has been accepted for presentation at ESA 2015, to be held in Patras, Greece, September 14-16.

As usual for ESA, the competition was very tight. We received a record number of 320 submissions and selected 85 papers, for an acceptance rate of about 26%.

On behalf of both Program Committees, we congratulate you on the acceptance of your paper.

You will receive reviewers' comments on your submission shortly. We hope that you will find the reviews helpful for the preparation of the camera ready version of your paper, which is due by July 7 (strict deadline).

As usual, we expect that at least one the authors of every paper will attend the conference and present the paper.

With best regards and looking forward to seeing you in Patras,

Nikhil Bansal & Irene Finocchi
ESA 2015 Program Committee Chairs
